

MedInvent, LLC announces issuance of new US patent 8,162,921

April 24, 2012, White Bear Lake, MN. MedInvent, LLC announced today the issuance of US Patent 8,162,921 Method and device for nasal irrigation and drug delivery.

William Flickinger, Managing Partner at MedInvent, LLC noted: "We are pleased that this patent extends the term of protection of the intellectual property surrounding the Nasoneb Nasal Nebulizer and forms the basis for future patents that are currently filed. We will continue to help advance patient care by funding studies to investigate the clinical impact of topical therapy delivered via the NasoNeb Nasal Nebulizer."

The NasoNeb Nasal Nebulizer is available by prescription-only compounding pharmacies across the US and in select countries.
